Restrain

The natural replacement to CIPC

Anti-sprouting for potatoes

Restrain uses natural ethylene gas which keeps your potatoes dormant and prevents sprouting. Using ethylene gas means you won't leave any residue in your crop or storage facility, allowing you to deliver potatoes which can be used immediately for processing.

Key benefits of ethylene gas

Restrain controls sprouting for your processing and table potatoes, without leaving a chemical residue on the potato peel.

- Suitable in all stores
- Excellent fry colours in trials
- User-friendly
- Cost-effective
